# Earn SDB / WOSB Evaluation Credits

## Routine Purchases = SDB/WOSB Credits

Your organization is likely spending many thousands of dollars in industrial bolting equipment purchases every year. Now, by directing these purchases to Arlington Machine and Tool Co, you'll be able to accumulate US Federal Government credits towards your SDB WOSB goals. Consider the level of your present expenditures spread amongst a number of suppliers and you'll quickly realize just how easy it will be to help your company reach its goals.

### • Arlington Machine & Tool

Arlington Machine and Tool Co, an SDB and WOSB accredited organization, is the Manufacturer, Strategic Business Partner and a Distributor of Titan Technologies. In June, 2006, the company acquired its DUNS listing with the Federal Government (048791032). This status allows customers of industrial bolting products to place their orders through Arlington and thereby accumulate federal credits. Since Arlington is listed as a Small, Disadvantaged Business and a Woman Owned Small Business, customers are able to accumulate both kinds of credits.

### • Titan Technologies International

Titan is one of the world's leading designers and suppliers of severe-duty industrial bolting tools. The company was formed in response to industry's call for compact, light-weight yet highly robust hydraulic torque wrenches. Over the years, pneumatic and air driven torque wrenches and hydraulic bolt tensioners were added to the product mix. Today, Titan has one of the widest range of tools available in the market.

### Addressing the needs of your End Users...

It's not always easy to drive change through the organization, especially from top to bottom! However, if they're not familiar with us yet, rest assured that your colleagues will come to appreciate your introduction of Titan equipment to them. Titan is an American company born out of industry's demand for a provider of reliable, ergonomic and light-weight industrial bolting equipment. Titan's core mandate was to design equipment which exhibited superior longevity to tools which were available at the time. That goal has not only been reached, it's been surpassed! Indeed, you'll probably find that we even supply repair components which can be used to upgrade some of your company's existing tooling. So, not only does your organization get SDB/WOSB credits, it also gets superior products and cost savings!

### Addressing your needs ...

Call us today! We're Hevi Technology, Titan's and Arlington's representative for this part of the country. We're here to:

- help you develop the bolting equipment purchasing policies to take advantage of these credits
- help you support your in-field colleagues by providing hands-on demonstrations of the equipment
- maintain everybody's satisfaction by giving prompt, efficient technical and business support
